Designed by Syd Mead in 1968 for Steve Jobs' first product to go on sale, the Torpedo's cute shape and cool light became instantly recognisable throughout the Mac community. Its charm and style have been replicated many times over since its discontinuation, even in the later iterations of the iMac, but the Torpedo's sheer class and originality has remained intact. Funko's exclusive series of 1:6 scale collectibles are renowned for their incredible detail and have become a true cult phenomenon, so be sure to keep an eye out for them. Funko's Apple LED Torch is a collectible exclusive to 7digital. Offer valid through 3 November, 2019 only. Product Description 1:6 scale collectible designed by Syd Mead in 1968 for Steve Jobs' first product to go on sale Cute retro-cool shape gets instantly recognisable throughout the Mac community Design by Syd Mead Amazing detail and craftsmanship, combined with a beautiful flame design Features cool on/off button with switch for smooth, easy activation Designed by Syd Mead in 1968 for Steve Jobs' first product to go on saleQ: Command line arguments in C - pointers to arrays Given a command line argument int flag; in my main function, can I create an array of size flag using the command line argument

Category:Pediatrics books Category:Medical manuals Category:Family medicineQ: How to scroll to the bottom of a group of divs I am building a group of divs: Each one is made with jQuery (using animate()) and they all have the same height When I call the function, I want to scroll to the bottom of all the divs at once When I do scroll and the divs are all already visible, nothing happens. How can I achieve this? I've been experimenting with the scrollTo method for some hours now, but I can't get it to work I tried: \$(div.active').scrollTo('bottom'); and \$(div.active').scrollTo(\$('div.active').get(0).scrollHeight, {offset:-65}); and \$(div.active).each(function() { this.scrollTo(0, (this.scrollHeight + this.scrollTop)) }); A: Try the following: \$(div.active).each(function() { this.scrollTo(0, (this.scrollHeight + this.scrollTop)) }); The influence of the host's plasma proteins on the peroral absorption of 17 beta-estradiol. The efficacy of the conversion of 17 beta-estradiol (17 beta-E2) into the active, physiologically active estrogens is dependent on in vivo and in vitro metabolism to the 17 beta-glucuronide. The current study was designed to determine the influence of the host's plasma proteins on the conversion of 17 f678ea9f9e
